Technical Focus: AI Systems | VLSI & Hardware Acceleration | Energy-Efficient Computing

Education

BE - ECE	New Horizon College of Engineering	2023 - Present	9.52
XII	Akhil Jr. College	2020 - 2022	59%
X	Sree Niketan EM School	2019 - 2020	95.33%

Core Competencies

- Machine Learning & Deep Learning (CNN, NLP)
- Hardware Acceleration & Parallel Computing
- VLSI Design & Embedded Systems (Arduino, Microcontrollers)
- System Optimization (Latency, Power, Energy Efficiency)
- AI Tools

Projects

- **AI Portfolio Chatbot** — Developed an **AI-powered interactive portfolio chatbot** using Node.js, JavaScript, HTML/CSS, and Openrouter APIs, featuring conversational memory, personalized responses, GitHub integration, and a ChatGPT inspired UI. Live Demo: [LYNX – AI Portfolio Assistant](#)
- **Space Image Classifier** — Built and deployed a **CNN-based deep learning model** to classify stars and galaxies using TensorFlow with a real-time web interface built on **Gradio/Streamlit**. Live Demo: [Hugging Face Space Demo](#)
- **AI Smart Health Assistant** — Developed an **NLP-based** healthcare assistant with API integration and fallback response logic to provide reliable symptom-based guidance using **Gradio** and **Hugging Face** models.
- **Data Center Energy Optimization (Ongoing)** — Designing an **ML-based system** to predict power consumption and optimize workload allocation and cooling efficiency in data center environments.
- **Hardware Accelerator** — Designed and simulated a digital hardware accelerator to improve computational efficiency through parallel processing architecture and optimized data flow techniques.
- **Voice-Controlled Robot (Vocobot)** — Built an Arduino-based robotic system with Bluetooth voice control, ultrasonic obstacle detection, and motor driver integration for autonomous navigation.
- **GPS Relativity Simulation (Ongoing)** — Simulating relativistic time dilation effects in GPS satellite systems using principles of special and general relativity.

Certifications:

Artificial Intelligence — Infosys Springboard
R Programming — Infosys Springboard
Introduction to Microprocessors — NPTEL
Cadence ASIC Synthesis — Udemy
Prompt Engineering: How to Talk to the AIs - LinkedIn

Tools & Technologies:

Programming & ML: Python, TensorFlow
Hardware & VLSI: Verilog, Quartus Prime, Xilinx Vivado
Embedded Systems: Arduino IDE
Platforms & Deployment: Gradio, Streamlit, Hugging Face, Visual Studio Code
Systems & Tools: Linux, Git

Conferences, Hackathons & Leadership

- **Conference:** International Conference on Advancement in Futuristic Technologies (ICAFT), 2025; Paper published in IEEE Xplore: VOCOBOT
- **Hackathon:** IEEE AESS Hackathon 2025 (Second Place)
- Board Member, STEM Club (2023 - 2024)
